

QE20-FP2009
QE20 Single 240W Amplifier Module Kit

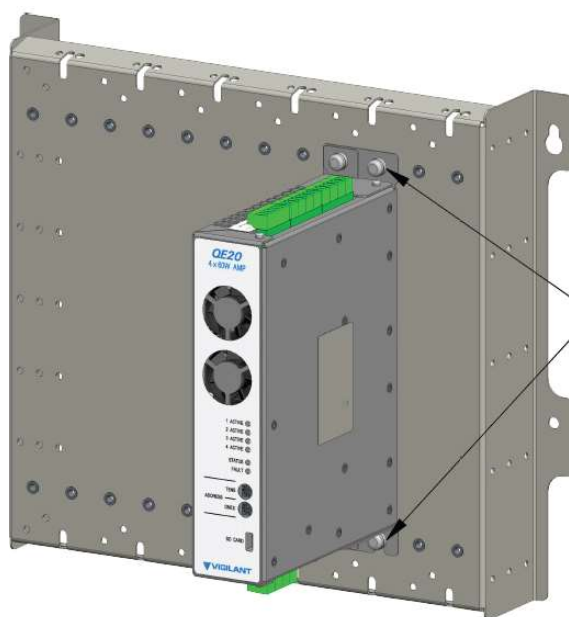

The **QE20-FP2009 1 x 240W Amplifier Module** may be used to provide 1 x 100V 240W loudspeaker outputs in a QE20 system or as a replacement for an existing module in the field.

Each module provides:

- 1 x 100V audio outputs rated at 240W
- The 100V output is resistor EOL supervised with up to 2 branches of wiring
- 4 x 24VDC switched GP outputs that are normally energised and can be individually turned off – usually for controlling background music volume controllers or similar devices that need to be disabled when emergency signals are being generated
- 1 x isolated line-level audio inputs for BGM, paging, etc.
- LED indication of the 1 x 100V output signal

Each kit contains:

- 1 x 1 x 240W Amplifier Module
- 1 x RJ45 ethernet lead, 200mm long
- 1 x RJ45 ethernet lead, 1000mm long
- 1 x 24VDC 2way extension loom
- 1 x 3way splitter loom
- 4 x M6 x 10mm mounting screws
- 1 x Installation Guide

Mount Amplifier Module with four M6 x 10 Screws provided with module.
