

## QE20-FP2026

### QE20 Controller Module Kit (shallow)

The **QE20-FP2026 Controller Module** is the ‘brain’ of the QE20 EWIS system.

The controller module may be used to provide an additional node in a networked QE20 system, or as a replacement for an existing controller module in the field.

This version, QE20-FP2026, is for shallow QE20 cabinets (SECP). For deep QE20 cabinets (MECP), use part number QE20-FP2000.

**Each kit contains:**

- 1 x Controller Module
- 1 x 3way 24VDC distribution loom
- 4 x M4 x 10mm mounting screws
- 1 x Installation guide
